

A PRINCE AS A SON-IN-LAW.

There are always little drawbacks attending many of the things most devoutly wished for in this world of imperfections. One would imagine that the possession of a real live Prince as a son-in-law would render the pathway of life a blissful dream, but it seems that it is not always so. While Princes usually make life very interesting to their American purchasers who have secured them as the leading family attraction, their highly developed propensity for spending money—upon gambling and other women than their wives—gives the exalted parents ample opportunity for awe-struck reflection when the bills begin to come in.

If there is anything calculated to make American exaggeration take a back seat, it is the size of the bills which the representative of ancestry are pleased to have their connubial parents foot.

The American girl of ambitious parents who has been sacrificed upon the hymeneal altar to some brainless, debauched, vulgar and brutal representative of a name with a handle to it, to become the wife of a something which is the ultimate product of centuries of evolution from the genius Homo back to baboonhood, seems to be the only one really to be pitied. Her happiness usually ends with the skyrocket fizzle and pop and red and green lights of a big marriage. Despised and ill-treated afterwards by her husband, whose flagrant immorality puts her marriage with him to shame, she has but one solace to look forward to—the divorce court.

The Prince looks upon his marriage as a bargain and sale affair. For value received, and a good deal of it, he confers the beatitude of his name upon the daughter of some aspiring parents, the most to be said concerning whom is that they have money. The wife is the sole objectionable condition; his bond calls for the observance of not even conventional respect and fair treatment to her, and he does not feel it, as a rule, incumbent upon him to voluntarily observe such. The parents see in the marriage the opening door to them of society, as the father and the mother of the Countess this or the Princess that and they are willing to pay liberally for it.

Every year some one or more American possessors of a Prince in the family are upon the rack counting up the cost and wondering audibly whether they have not paid too much for the whistle. Just now it is John W. Mackay and wife, widow of Nevada, who have a luminary in the family in the shape of an Italian Prince de Colonna, which has cost the exalted parents something near five million dollars, besides some sleepless nights, and to get severed from which they are now preparing to invoke the divorce courts.

STATE FUNDS.

The Board of Examiners, which is composed of Governor Colcord, Secretary of State Grey and Attorney-General Torreyson, jointly and severally swear that on the 28th ultimo, after having ascertained from the books of the State Controller the amount of money which should be in the State Treasury, made an official examination and count of said money and found the same to correspond with the Controller's books. They found \$203,927.90 in gold and \$25,804.77 in paid vouchers, not needed to the Controller, in the Treasury. In the school fund they found an irredeemable State bond for \$380,000; State bonds subject to redemption for \$185,000, and United States bonds for \$100,000, making a total of \$1,066,000. It appears that there is no coin in the State school fund at the present time.

It must be admitted by Nevada's traducers that financially the State is on a good basis. What it owes is due the school fund, so that the interest which the people pay goes to educate their children. If the name of Nevada is flouted from the map and its territory divided between California and Utah, they will be the gainers by over a million dollars, one-half of which is invested in United States bonds.

TAXES ON THE GOULD ESTATE.

The long fight between the heirs of the estate of Jay Gould and the Department of Taxes and Assessments over the assessment of the estate for \$10,000,000 for personal property has had a new feature added to it within a few days. Edwin Gould has leased the Baron Court property in Tarrytown, with the avowed intention of making that his home, for taxable purposes, at least. By this move Mr. Gould, as one of the executors of his father's estate, will save a tax of \$182,000 which the personal property of that estate now bears. He will also save an annual tax on \$100,000 or \$182,000, which he pays on his own account. This trouble between the Goulds and the Tax Department dates back to just after Jay Gould's death, on December 2, 1892, when the probate of Gould's will showed his property, real and personal, to amount to \$72,000,000. The Tax Commissioners then levied the personal tax on the estate at \$10,000,000 in place of \$20,000, the amount Jay Gould said he owned.

WORLD'S FAIR RIBBONS.

Hanging in the window of the Bank of Nevada are three ribbons issued the State of Nevada by the World's Columbian Exposition, showing the awards taken by Nevada in the three departments of agriculture, mines and mining and horticulture. They are very beautiful in design, the lettering and decorations printed in gold and were brought by Mr. Yerington from Chicago. They are the property of the State and will eventually be placed in the capitol.

New French Cabinet.

PARIS, November 30.—The latest forecast of the new cabinet is as follows: Premier and Minister of Foreign Affairs, Casimir-Perier; Interior, Raynal; Finance, Burdeau; Education, Spuller; Justice, Dubest; Commerce, Connart; War, General Mercier; Public Works, Loubet; Husbandry, Kerjegi; Colonies, Delcasse; Marine, either Admiral Lefevre or Lefevre.

It is stated that Spuller's failure to form a cabinet was due to the difficulty between himself and President Carnot as to the admission or exclusion of Constans as a member of the Ministry.

President Carnot, it is said, was at one time so disturbed over the possibility of a protracted crisis that he was considering the advisability of resigning the Presidency.

Princeton Victorious.

New York, November 30.—Down in the ashes of defeat with torn crinoline and disheveled hair sits the football goddess of Yale. She does not wear sackcloth, because the emergency was sudden and she had no gown of that description in her wardrobe. For the next twelve months she will weep and wail, like Hagar in the wilderness, and the work of care will get in its fine work on a cheek that is unused to anything worse than the cold cream of victory. Her spotless record of three years was broken by the sharpest-clawed band of tigers that ever came out of Princeton jungles. The battle was a Balklava where the light brigade came out victorious.

Corbett and Mitchell.

St. Louis, November 30.—When R. O. Fate started for Mexico some weeks ago to prepare for the opening of a racetrack there he had in view the securing also of the Corbett-Mitchell fight. That the Mexican Government will not object is evidenced by the following dispatch received to-day:

CITY OF MEXICO, November 30.—Should the Corbett-Mitchell fight fall through at Jacksonville I can arrange it here. Notify Brady and Mitchell.

R. C. FATE.

As Governor Mitchell of Florida shows signs of interfering, it is not impossible that the fight may go to the Southern republic.

All Quiet in Hawaii.

SAN FRANCISCO, December 1.—The brig John D. Spreckels has arrived in ballast after a smart run of eleven days from Kahului. Her sailing date was three days later than that of the Alameda, but Captain Christensen reports that no advice of any change in the situation had reached Kahului from Honolulu up to the hour of his departure. The interisland mail steamer out a few hours from the capital was sighted, but signaled nothing in the way of revolutionary news.

A NORTHERN ROMANCE.

A Widow Who Was a Good Cook, a Susceptible Bachelor and an Elopement.

Frank Emmitt returned home Thursday morning from a trip up north. A little romance was the cause of the journey. It appears that Mr. Emmitt some months ago had rented his northern farm to a middle-aged bachelor who hired a widow lady of staid and demure appearance to do the cooking for him and the ranch hands.

In the ordinary course of events only one result can be the outcome to a lonely and susceptible bachelor when placed upon a farm with a prepossessing widow who knows well how to reach the average man's heart by shrewd attacks upon that organ through the medium of his stomach. The latent spark of love was kindled in his palpitating bosom, and he proceeded to lay violent siege to her affections.

The usual way of a commonplace marriage with a sober divorcee in retrospect was not quite up to the awakened ardor of the newly accepted suitor. Therefore an elopement was planned and successfully executed. Mr. Emmitt went up north to find what had been inadvertently overlooked by the couple on their wedding tour, and was well pleased to find everything intact. A few days since he was surprised while there by the return of the hero of the occasion, minus a considerable portion of his enthusiasm at least, having arrived at the conclusion that marriage is not what it is cracked up to be. The bride, or widow as the case may be, did not return, having presumably arrived at a like conclusion. As Mr. Emmitt's blessing on the union seemed superfluous he came home, leaving the late groom to moralize at leisure upon the illusions of life.

TO KEEP CIDER SWEET.

A Scientific Method of Arresting Fermentation.

Pure, sweet cider that is arrested in the process of fermentation before it becomes acetic acid, or even alcohol, and with carbonic acid gas worked out, is one of the most delightful beverages, says the *Scientific American*. The following scientific method of treating cider will preserve its sweetness: When the saccharine matter by fermentation are being converted into alcohol, if a bent tube be inserted air tight into the bung, with the other end in the pail of water, to allow the carbonic acid gas evolved to pass off without admitting any air into the barrel, a beverage will be obtained that is fit nectar for the gods. A handy way is to fill your cask nearly up to the wooden faucet, when the cask is rolled so the bung is down. Get a common rubber tube and slip it over the end of the plug in the faucet, with the other end in the pail. Then turn the plug so the cider can have communication with the pail. After the water ceases to bubble, bottle or store away.

After shaving or exposure to cold use Myrtle Balm, 25 cents. Pinniger's, Virginia St.

BUSINESS LOCALS.

Take your prescriptions to McCullough's, no-commission dispensary. For rough or chapped skin use Myrtle Balm 25 cents. Pinniger's, Virginia street. LaGrippe.

During the prevalence of the gripe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after-effects of the malady. This remedy seems to have a peculiar power in affecting rapid cures of La Grippe, but in all diseases of the Throat, Chest and Lungs, and has cured cases of Asthma and Hay Fever of long standing. Try it and be convinced. It won't disappoint. Free Trial Bottles at S. J. Hodgkinson's drug store.

Strength and Health.

If you are not feeling strong and healthy try Electric Bitters. If "La Grippe" has left you weak and weary, use Electric Bitters. This remedy acts directly on liver, stomach and kidneys, gently aiding those organs to perform their functions. If you are afflicted with sick headache you will find speedy and permanent relief by taking Electric Bitters. One trial will convince you that this is the remedy you need. Large bottles only 50¢, at S. J. Hodgkinson's drug store.

IN OLDEN TIMES.

People overlooked the importance of permanently beneficial effects and were satisfied with transient action, but now that it is generally known that Syrup of Figs will permanently cure habitual constipation, well-informed people will not buy other laxatives, which act for a time, but finally injure the system.

Impending Crisis.

Dr. H. H. Hogan will deliver a lecture upon the present political parties and financial condition of our country, at the court-house in Reno on Saturday next, December 2, 1893, at 7 o'clock p. m. Citizens, irrespective of party and ladies are especially invited to attend. Several speakers will be present and address the meeting. no281d

The Old Way.

Is to take pills when you are constipated or bilious, they won't go down easy, and when they get down there's a shudder, the better way is to take Simmons Liver Regulator, nature's own remedy pure vegetable, in liquid or powder form. You can take a pinch of the powder on the tongue and with a sip of water swallow it without taste. The Regulator tones up the digestive organs and prevents indigestion and Constipation.

Bucklen's Arnica Salve.

The best salve in the world for Cuts Bruises, Scres, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chillsbains, Corns, and all skin eruptions, and positively cures Piles or no pain required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by S. J. Hodgkinson.

Every Dose Effective.

KNOWLEDGE.

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers, and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

There are only about a thousand tons of hay left unsold at Lovelock.

The annual meeting of the State Board of Agriculture will be held today.

Prof. C. H. Groves departed on yesterday afternoon's local for Mason valley.

W. D. Jones has been selected as the Lander county member of the Irrigation Commission of Nevada.

A large cistern for fire purposes is being constructed upon Virginia street near Dr. Thoma's residence.

E. D. Kelley and T. V. Julien left yesterday morning to attend the funeral of Uncle George Walker at Winnemucca.

The Daughters of Rebekah, I. O. O. F., will give a grand New Year's ball in the pavilion on Monday evening, January 1, 1934.

Joe Eason and Miss Bessie Gault were thrown out of a cart by reason of a runaway when returning from the masquerade Thursday night.

So many chickens and turkeys were brought in for Thanksgiving from the northern valleys that the market suffered a collapse in prices.

The largest assortment of heating stoves, parlor stoves, cook stoves and ranges, crockery and lamps at panic prices at Lange & Schmidt's.

There were 6,753 sugar producers licensed to manufacture sugar during the fiscal year ending June 30, 1933, and \$9,875,130 was paid as a bounty upon 432,125,081 pounds of sugar.

The following gentlemen have contributed \$100 each towards defraying the expenses of the Midwinter Fair: R. K. Colcord, M. D. Foley, Theo. Winters, John Bradley and John Lee of Washworth.

Five new dwelling houses are in course of construction in different parts of town, two of them being very handsome structures. Reno seems to hold her own in spite of the hard times prevailing elsewhere.

John Neffley arrived last evening from Prescott, Arizona, with the body of his brother Charles, who died at that place last Sunday, which will be buried here. F. T. Neffley and wife of Johnstown, Plumas county, arrived yesterday to attend the funeral.

The case of the State of Nevada ex rel H. H. Beck vs. the County Commissioners and Auditor Williams, upon whom was served a writ of certiorari restraining them from paying out a thousand dollars toward the expenses of the 4th of July celebration, will be argued before the Supreme Court Monday.

INFORMAL MEETING.

The Agricultural Society and Midwinter Fair Matters.

The State Board of Agriculture held an informal meeting Thursday at the Bank of Nevada. There were present Governor Colcord, President Martin, Hon. Evan Williams, M. D. Foley, J. R. Bradley, W. D. Phillips, P. H. Mulcahy, T. K. Hymers and J. A. Yerington.

The object of the meeting was to consult with Mr. Yerington with regard to the Nevada exhibit at the Midwinter Fair. Mr. Yerington favored a building constructed in the form of a Greek cross, like the Brazilian building at Chicago, which he declared was one of the most beautiful edifices there. A general talk followed with regard to the ways and means best to be followed in order to make the exhibit a success.

The meeting adjourned to take definite action at the regular annual meeting of the Agricultural Society to be held today.

Prof. W. O. Pearson.

Organ registration and manipulation taught thoroughly. Organ tuning and repairing a specialty. Special attention given to beginners on the piano.

Leave orders at C. J. Brookins' music store.

THE CARNIVAL.

A Brilliant Event—Very Handsome Costumes and Many Original Groups and Characters.

The O. of U. carnival and masquerade under the management of P. H. Mulcahy was a brilliant success. Long before the grand march the crowd began to arrive, and when the march commenced there was standing room only. It was the most interesting event of the kind ever seen in Reno, there being lively competition among the five groups for the \$50 prize, which was captured by the Darktown Fire Brigade composed of the following gentlemen: Shep Case, Foreman; Fred White, Will Murray, Oscar Phipps, H. P. Remington, Sim Williams, Leon Malotte, Sam Armarko and A. J. Pritchett.

The other prizes were awarded as follows: Best dressed lady, Russian Princess, Gertie Hollingsworth.

Best dressed gentleman, Russian Prince, T. A. Wright.

Most original character (lady), Extra Pale, Mrs. H. Campbell and Clara Lave.

Most original character (gentleman), La Grip, Walter Wright.

Best sustained character, Grandmother Fifty Years Ago, Mrs. R. Upson.

The carnival was pronounced a success in every feature and it was a matter of surprise to see so many maskers on the floor. Many of the costumes were extremely beautiful, while others of the mirth giving variety kept the many spectators in good humor.

While the Darktown Fire Brigade, which reproduced that old time picture so familiar to all in a remarkably clever manner, carried off the big prize of \$50 in coin, they did not do so without an effort, for there were other groups which were able seconds.

The Spanish Fortune Tellers, represented by eight young ladies, called forth admiration for their magnificent costumes. The young ladies looked sweet.

The Cotton Pickers, by eight ladies and gentlemen students of the University, were the observed of all observers, and when they began their plantation songs, a rush was made for the end of the hall they occupied.

The young ladies calling themselves the rainbows looked as neat and trim as they well could, and entertained the spectators with a drill.

The tramps, another group, was good, but to give an idea of the many characters represented, the following list is published:

Henry Riter, Domino.

Mrs. Henry Riter, Domino.

NEVADA'S BIG SCOOP.

Thirty-Seven Awards Taken at the World's Fair.

The fruits of the expenditure of ten thousand dollars in representing Nevada's resources at the World's Columbian Exposition are just now becoming apparent. The State secured thirty-seven of the chief awards, comprising those most important in agriculture.

That Nevada, generally considered to be the least State in the Union from an agricultural standpoint, should receive the highest awards given in the Department of Agriculture, namely upon wheat, barley, millet, oats, timothy, alfalfa, bunch grass, seeds, sorghum, potatoes, honey, butter and cheese, is something that will have its effect in advertising the State. It was expected that Nevada would fare well when it came to awards upon minerals, but when we practically sweep the field in agriculture it becomes a matter not only of congratulation, but one that will bear important results in awakening attention to this section of the arid region.

Nevada was awarded the first premium on flour and in the department of implements on windmills.

Following is a list of the awards:

DEPARTMENT A, AGRICULTURE.

First premium on flour (from the Riverside Mills, Reno), wheat, barley, millet, oats, timothy, alfalfa, bunch grass, seeds, sorghum, potatoes, honey, butter and cheese.

DEPARTMENT B, IMPLEMENTS.

Windmill and solid wind wheel, first premium, gold medal and diploma, Multi-Motor Co., Reno.

DEPARTMENT C, MINES AND MINING.

Sky blue marble, W. E. Lindsay.

Sulphur, Alex. Wise.

Silica, Silox Manufacturing Co.

Refined borax, Nevada Salt & Borax Co.

Native rock salt, D. Bonelli.

Mineral exhibit, J. Grandmeyer.

Mineral exhibit, State of Nevada.

Native tinical, Conn & Trudo.

Borax precipitate, Conn & Trudo.

Native carbonate of soda, Inyo Development Co.

Bi-carbonate of soda, Inyo Development Co.

Native soda crystals, Inyo Development Co.

Soda Ash, Occidental Alkali Co.

Natural carbonate soda, Occidental Alkali Co.

Refined Soda, Occidental Alkali Co.

DEPARTMENT D, AGRICULTURE.

There were 40 varieties of apples in this exhibit, contributed by Ross Lewers of Washoe, James Howard, W. H. Joy, from Reno shippers, and unknown shippers from Humboldt, Nye and Lincoln counties.

The committee, finding that the Nevada apples were not on exhibition in the Horticultural Department, went outside the department to make the award, a thing only done in this one instance.

They said that the Nevada apples were so far in advance of the other pomological exhibits as to justify them in this action.

CHEMICAL TESTS.

In all the exhibits of minerals and primates, Mr. Yerington insisted on accurate chemical tests. As a result Nevada swept the field again. The Nevada salt recorded 99.98, exhibited by D. Bonelli of Lincoln.

The exhibitors also sent the first grapes and figs to the World's Fair, arriving there in advance of any other State on June 17th.

Alexander Millet of Humboldt took first premium for sulphur. Its test showed 99.92, capturing the first prize for purity against the world. The Occidental Alkali Company captured the first award for natural carbonate of soda with a chemical analysis of 91.90.

The Silica Mining Company of Esmeralda had a big array of the polishing compounds of the Eastern companies against them. Heretofore the Aluminum Lustre Co. of New York

has stood at the head of these companies, but it had to lower its colors to Nevada. Our native silicate assayed, silicate 92 per cent., aluminum 6 per cent., magnesia 2 per cent. The aluminum gives it its high polishing power and the other companies could only show one-half of one per cent. of this. Hence the award to Nevada.

WEATHER BULLETIN

Predictors of a Mild Winter to be Disappointed—Magnetic Poles.

Copyrighted 1893 by W. T. Foster.

St. Joseph, Mo., November 24.—My last bulletin gave forecast of the storm wave to cross the continent from December 4th to 8th, and the next will reach the Pacific Coast about the 9th cross the Western mountains by the close of the 10th the Great Central valleys from the 11th to the 13th and the Eastern States about the 14th.

The cold wave following this storm will be its most notable feature, as it will be more severe than usual. Cool waves are usually considered the winding up of storms, especially from the 1st of April to the 1st of October, but the seat of energy will appear to reside in the cool wave that will cross the continent from December 6th to 10th, and from the 12th to 16th. As this last mentioned cool wave nears the New England States about the 15th or 16th, it will probably develop unusual force.

The warm wave will cross the Western mountains about the 8th, the Great Central valleys about the 11th and the Eastern States about the 13th. The cool wave will cross the Western mountains about the 12th, the Great Central valleys about the 14th and the Eastern States about the 16th.

About November 18th, the causes of precipitation were expected to change their influence, causing a large increase of rain and snow in December and January where precipitation is deficient.

Those who have expected a mild winter are doomed to disappointment. Severe cold, however seldom covers the whole continent, and we may expect the severe weather in spots, giving to the country as a whole, what is termed a severe winter.

THE GREAT LIGHT GIVER.

Recent researches indicate that two belts of magnetic radiation, each about fifteen degrees wide, encircle the sun parallel with the equator, the center of each belt being about thirty-four degrees from the sun's magnetic poles.

These magnetic poles are supposed to be four and a half degrees from the sun's geographic poles and therefore the magnetic belts are about nine degrees nearer the sun's geographical equator on one side of the sun than on the other side.

These discoveries are supposed to have been made by Prof. Frank Bigelow, of the National Weather Bureau, and if he is correct about it a great similarity exists between the sun and earth in their magnetic arrangements.

The earth has four magnetic poles. One of these is on an island northwest of Hudson's bay near latitude 70 and longitude 70. The corresponding southern magnetic pole has never been exactly located. Another magnetic north pole has been found in Siberia about 68 degrees of north latitude and 120 east longitude, or near where these lines cross the Lena river. This magnetic north pole is about eight degrees further south than the one found on this continent. These magnetic poles are the

COLDEST PLACES ON EARTH

And it would appear that in them the cold of utter space came down to the earth. The weather is supposed to be much warmer at the earth's geographic north pole than at the magnetic north poles, twenty and twenty-eight degrees further south.

Secondary magnetic poles are also found. One of these lies southwest of Hudson's bay in northwestern Ontario, at about 50 north and 90 west. One cold wave appeared to come out of this secondary magnetic north pole. St. Vincent, Minnesota, is the nearest, in the United States, on the path of the cold waves, to that secondary magnetic center, and it is the coldest place in the United States.

If the National Bureau would arrange to have stations near that magnetic center, at Kewatin or Gilbert, north of the Lake of the woods, they would probably discover most of the cold waves days before they had reached the United States.

Prof. Bigelow places one of the two magnetic poles on the sun at 192 degrees west of the other so that they are on opposite sides of the sun by 78 degrees. Those of the earth are similar. The magnetic pole in Asia is 217 east of the one on this continent, leaving them only 143 degrees apart by the way of the west.

These magnetic poles not only have something to do with the weather of the earth and sun, but with their rotation on their axes. All over the earth are found permanent high barometers, as on all the great oceans, both north and south, and these places of permanent high pressures are the same as the magnetic poles, but of less force and greater dimensions.

At other points of the earth are found the opposite to these where are

PERFECT LOW BAROMETERS, As near Iceland, the Behring sea and all around the earth at its equator. In these latter the forces go from the earth. These appear to be the respiratory organs of the earth, through which it breathes the ether of space, on which it feeds and from which it accumulates and grows.

Prof. Bigelow's theory is that the magnetic poles of the sun throw out lines of force through which the earth must pass in its revolution around the sun and that passing through these lines of force the earth and its atmosphere are affected, causing changes in our weather. He has been at work on these lines for two years under pay of the government at about \$6 per day, and the result is that he is coming to my theory of weather changes at a rapid rate.

Years ago the Government was induced to spend large sums of money in

ANALYZING SOILS

In order to learn how to detect good soils. It was a failure, and the experienced farmer points out good soils at sight, while the scientific gentlemen, with all their costly experiments, are forced to acknowledge that they know nothing about what qualities are necessary for productive soils.

Prof. Bigelow and his class can discover magnetic poles and meridians of sun and earth, but when they come to apply these to the weather a failure is sure to result. It is the very nonsense to claim that the sun is the only weather disturbing cause and probably Prof. Bigelow will never get beyond that idea. His work only confirms planetary meteorologists in their theories. They discovered, many years ago, from effects on our atmosphere, the whole electro-magnetic field of forces and Bigelow and others are just now beginning to suspicion its existence.
